SUMMARY

Backend Software Engineer specializing in cloud-native microservices and distributed systems, with 4+ years building and optimizing production-grade platforms at IBM, CI&T, and NTT DATA.

Deep expertise in Java (Spring Boot, Quarkus), event-driven architectures (Kafka, Transactional Outbox), distributed data patterns, and API performance tuning — delivering measurable results such as 30–45% reductions in response latency across high-traffic enterprise systems.

Comfortable with ambiguity and cross-functional collaboration in distributed, fully remote environments. Fluent in English (C1).

TECHNICAL SKILLS

- Java, Spring Boot, Quarkus
- REST APIs, Microservices, BFF, Distributed Systems
- AWS, Azure, Docker, CI/CD
- PostgreSQL, MySQL, Oracle, MongoDB
- JUnit, Mockito

EXPERIENCE

Backend Software Engineer IBM · Enterprise Consulting

May 2025 – Present

- ▶ Reduced API response times by 30–45% through performance profiling, query optimization, and endpoint redesign across multiple client platforms.
- ▶ Led BFF architecture improvements that increased cross-application efficiency and reduced front-end payload complexity.
- ▶ Accelerated team delivery velocity by 25–40% by introducing modularization patterns and shared reusable components.
- ▶ Improved system reliability by driving targeted refactoring initiatives and raising automated test coverage on critical services.
- ▶ Contributed to architecture discussions and code reviews in a distributed, cloud-native environment.

Tech: Java · Spring Boot · Quarkus · AWS · Docker · REST APIs · PostgreSQL · MongoDB

Backend Software Engineer Montreal · Consulting Project

Feb 2025 – May 2025

- ▶ Designed and optimized backend APIs with a focus on throughput, latency, and fault tolerance.

- Built reusable infrastructure components aligned with platform architecture standards.
- Reduced production incidents through disciplined refactoring and expanded test coverage.

Tech: *Java · Spring Boot · REST APIs · PostgreSQL*

Backend Engineer

Oct 2024 – Feb 2025

CI&T · Consulting Project

- Improved backend performance and reliability by refactoring bottlenecks in critical business workflows.
- Modernized legacy integrations, reducing downstream failures and operational overhead.
- Strengthened CI/CD pipelines and automated test suites to increase deployment confidence.

Tech: *Java · Spring Boot · CI/CD · PostgreSQL*

Backend / Platform Engineer

Apr 2022 – Oct 2024

NTT DATA

- Contributed to migration of legacy monolithic systems to cloud-ready microservices architectures.
- Reduced backend latency through API redesign, connection pooling, and caching improvements.
- Drove modularization initiatives that improved team delivery velocity and reduced regression rates.
- Established higher stability standards through systematic refactoring and improved observability.

Tech: *Java · Spring Boot · AWS · Docker · PostgreSQL · MongoDB*

PROJECTS

Banking Ledger Core System

github.com/samuelbaldasso

Production-ready financial transaction engine implementing double-entry bookkeeping with Clean Architecture and DDD.

- Implemented Transactional Outbox Pattern (Kafka + PostgreSQL) ensuring at-least-once event delivery and zero data loss under failure scenarios.
- Enforced double-entry validation, pessimistic locking with deadlock-free ordering, AES-256 encryption at rest, and OAuth2/JWT via Keycloak.

Tech: *Java 21 · Spring Boot · Kafka · PostgreSQL · Keycloak · Docker · Flyway · Clean Architecture · DDD*

Java Subscription Platform

github.com/samuelbaldasso

B2C subscription management system demonstrating 6 production-grade distributed systems patterns.

- Applied Transactional Outbox, Optimistic Locking, Kafka idempotency, Redis caching, and Resilience4j circuit breakers in a single cohesive system.
- Full billing lifecycle (trial, renewal, cancellation) with event-driven async processing and Testcontainers integration tests.

Tech: *Java 17 · Spring Boot 3 · Kafka · Redis · PostgreSQL · Resilience4j · Testcontainers · Docker*

EDUCATION

Bachelor's Degree in Information Technology

FeMASS — Brazil

LANGUAGES

English Full Professional Proficiency (C1)
Spanish Professional Working Proficiency (B2)
